Projects (github.com/nicolasshak)

Fashion Final (fashionfinal.s3-website-us-west-1.amazonaws.com/)

- Written instead of writing an essay
- One day project
- Basic HTML, CSS

Personal Website (nicolasshak.com)

- Unusual website UI that attempts to draw on the user's familiarity with their OS' file browser.
- Built with jQuery and Node.js

UCSC PAGE (ucscpage.com)

- Aims to help students pick general education classes by circumventing the abysmal user experience of UCSC's class directory
- Web scraping with Python and built with React

UniToken (github.com/Firegred/University-Token)

- Basic e-commerce website based on a custom Ethereum smart contract. Produced with a team of four other students in four week-long sprints.
- Built with Bootstrap, Node.js, and MySQL

Skills

- o SCRUM Project Manager experience
- o Experience with version control software (Git)
- o Wireframing with Sketch
- o Familiar with Adobe suite: Illustrator, Photoshop, After Effects, and Premiere

Education

2016 - Current

University of California, Santa Cruz - Santa Cruz, CA, United States
