## Projects ([github.com/nicolasshak](https://github.com/nicolasshak))

---

### Green NYC ([topos-intern-challenge.s3-website-us-east-1.amazonaws.com](https://topos-intern-challenge.s3-website-us-east-1.amazonaws.com))

- Completed for intern challenge
- Compare street tree population by zip code
- Built with React

### UCSC PAGE ([ucscpage.com](http://ucscpage.com))

- Aims to help students pick general education classes by circumventing the abysmal user experience of UCSC's class directory
- Web scraping with Python, built with React

### Personal Website ([nicolasshak.com](http://nicolasshak.com))

- Unusual website UI that attempts to draw on the user's familiarity with their OS' file browser.
- Built with jQuery and Node.js

### UniToken ([github.com/Firegred/University-Token](https://github.com/Firegred/University-Token))

- Basic e-commerce website based on a custom Ethereum smart contract. Produced with a team of four other students in four week-long sprints.
- Built with Bootstrap, Node.js, and MySQL

## Skills

---

- o SCRUM Project Manager experience
- o Experience with version control software (Git)
- o Wireframing with Sketch
- o Familiar with Adobe suite: Illustrator, Photoshop, After Effects, and Premiere

## Education

---

2016 - Current

University of California, Santa Cruz - Santa Cruz, CA, United States
